ever shared, ever shared not/in the last 12 m., in the last 30 d.,
not answer, nk

TDI implementation: main steps after adoption

Activities

- Survey on feasibility of TDI implementation
- ***Print launch (copies available)***
- Assessment of situation on control on double counting
- Piloting TDI FONTE template

Meeting

- Working ^Sgroup meeting on 28/5/2012
- RTX Meeting May 2012
- TDI meeting 2012
- RTX meeting 2012

Results from survey: Feasibility of TDI implementation

- Most (22) countries deliver in 2014 (6 later)
- Most (20) can collect data on old variables easily (2 No – 2 with difficulties)
- Most can collect data on new variables (from 20 on HCV to 27 on polydrug use)
- Most (20) can implement other changes

Application of case definition: EMCDDA vs NATIONAL

- Matching in 12 countries
- Not matching but possible to change in 11 countries
- Not matching but possible to change with difficulties in 4 countries
- Not matching and not possible to change in 1 country

Expert opinion: needs and challenges

- Involvement, acceptance, motivation of professionals, treatment centres
- Technical support (including IT)
- Political and legal support
- Training/conferences
- National adaptation/Manuals
- EMCDDA support

Key dates

- 2012: preparatory work at national level
- 2013: actual data collection at national level
- 2014: data submission to EMCDDA
